## Black Logo

The logo should be in its original colors when used in light backgrounds.

Only when the background causes poor legibility can the black version be used.

## Icon Usage

MPC icon can be used alone. Only the icon should be used as a social media profile picture and favicon.

## Minimum Size

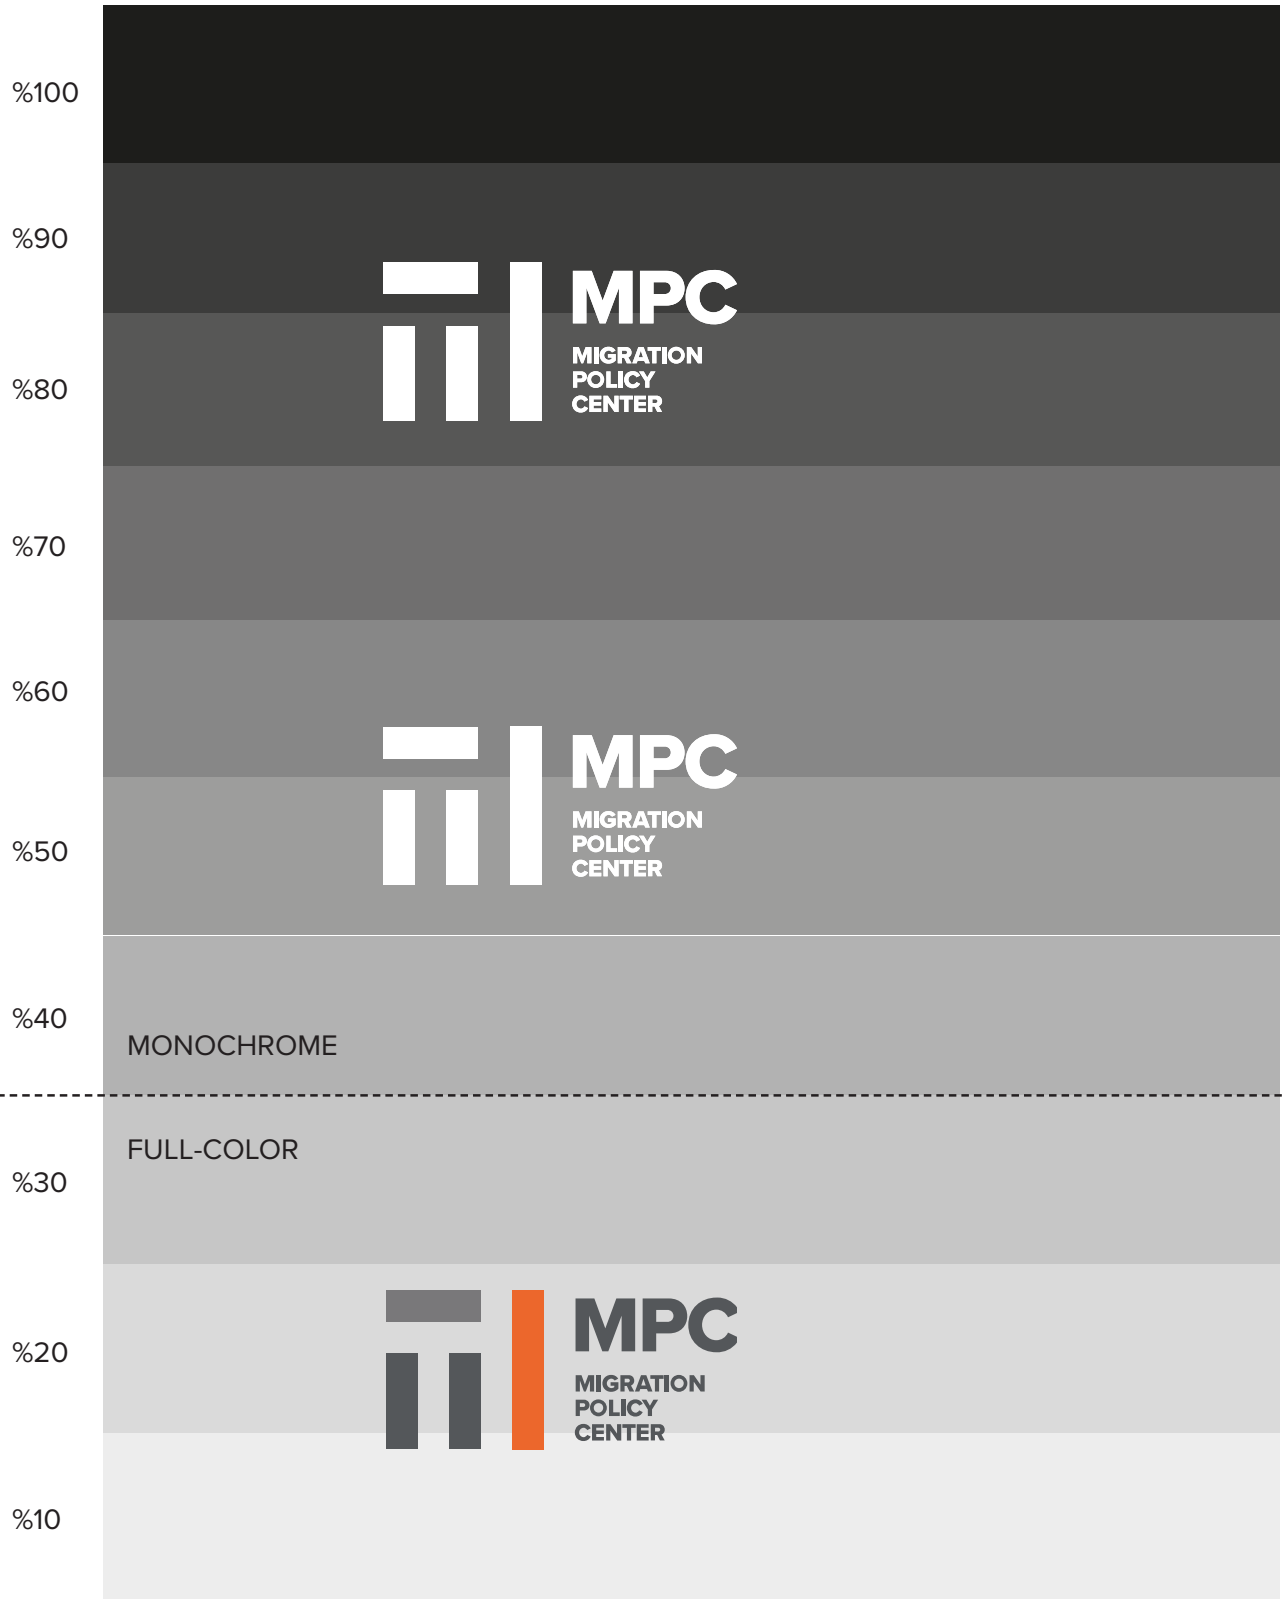

The minimum height of the logo is 10mm.

## Different Backgrounds

The white logo should be used on dark, and MPC orange backgrounds. On lighter backgrounds, when it is not required to use the logo in black or white due to illegibility, it should be in its original colors.

The correct use of the logo on different backgrounds is as follows.

## Photography and the Logo

When used on photos, the logo should be positioned to provide maximum contrast with the background. Contrast ratios are shown in the previous page.

If the logo is not legible, all white version should be used. An alternative color preference or shading cannot be made.

## Backgrounds Made of MPC Colors

The all-white version should be used on backgrounds that are MPC orange.

There is no colored negative version of the logo.

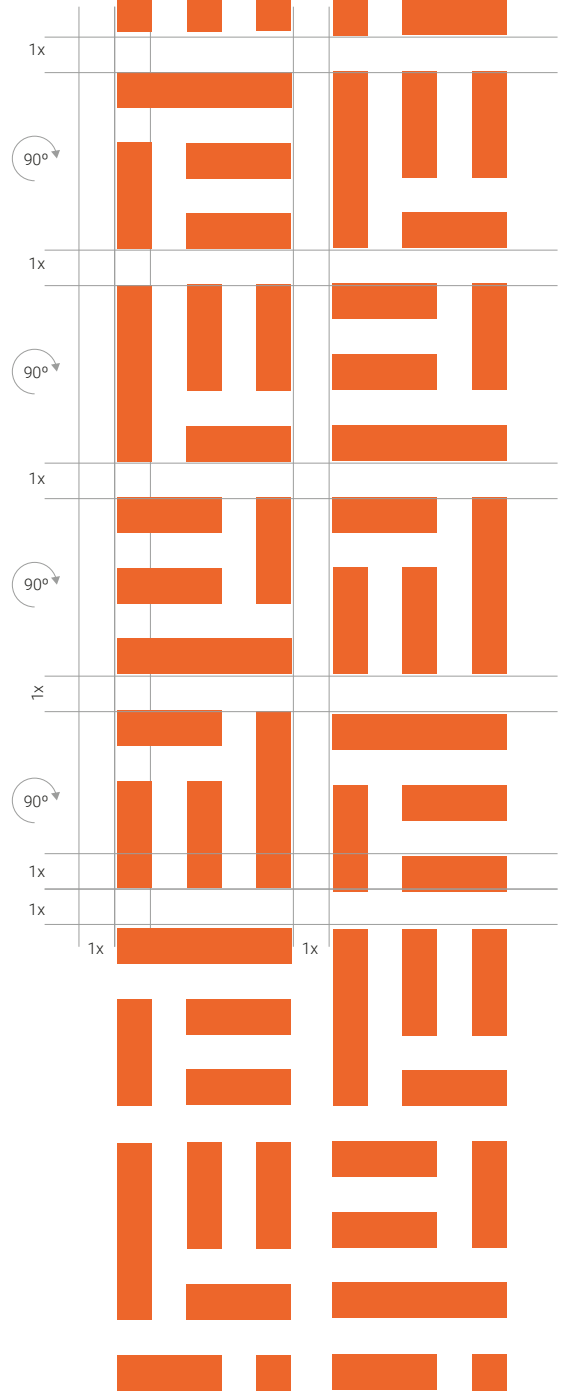

The white logo can also be used on MPC smoke gray or black backgrounds.

## Patterns created from the Logo

The following pattern was created by rotating the logo at 90 degrees angles. The pattern can be extended in 4-piece blocks and can be used in multiple strips.

The pattern can be used in full-colors on white backgrounds and white on orange and smoke gray backgrounds.

The logo and pattern should be used in harmony with each other. They should not overlap and the gaps between the lines should be as follows.
